# Qué es la Red Social

Algo ridículamente complicado...

# Qué es la Red Social

... que ha cambiado para siempre nuestra concepción del mundo en línea

Video Source: <http://youtu.be/cgP8WuCXIOQ>

Social web has forever changed the on line word  
Some Social figures that explain this big revolution  
Over 500M users on Facebook  
170M on Twitter

Over 150 M active users currently accessing Facebook through their mobile devices  
The picture shows the result of a research made by a Japanese web agency (go-globe.com) about what happens in 60s seconds on the web...Some numbers are really impressive

# Qué es la Red Social

..que afecta a todas las facetas de la vida (en línea y fuera de ella)

Social business effects are throughout on line and off line life

Some examples:

Social – Facebook. Average 137 friends, 20% people with whom users would have had no contact otherwise. People spend more time connecting on facebook and less on phone, email.

Cultural –

Knowledge- University of the people: access to higher education in developing and third world countries

Leisure- Zynga has 360M active monthly users.

Productivity – applications like Yammer, Jive, Chatter have been shown to increase productivity

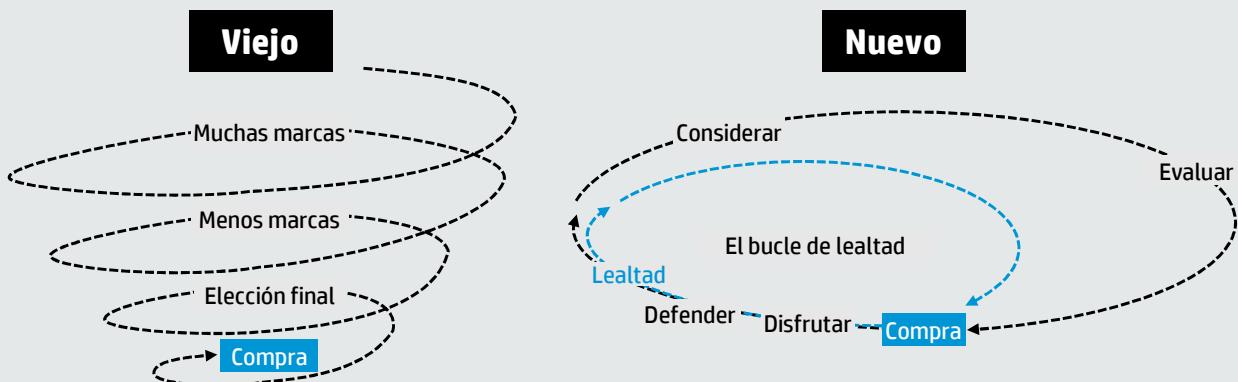

Influence – Arab world revolution, Obama campaign, etc. demonstrate ability to influence cross geographies, religion, gender

Access – People now have access to knowledge, resources, assets

Work opportunity – Companies seek social networks for candidates, LinkedIn has become the largest professional network in the US with largest sectors in Finance, Service, High Tech, and Health on the rise.

# Cómo impactan las redes sociales

Modifican el modelo de decisión de los consumidores

Los consumidores comienzan en el extremo ancho del embudo y reducen el número de marcas hasta la elección final.

Lealtad a la marca

La metáfora del embudo ya no funciona

Viaje mucho más iterativo y menos reductivo para tomar la decisión de compra de HOY

This scenario forces companies to rethink how to effectively reach consumers

Some times ago: The Funnel Metaphor

For years, marketers assumed that consumers started with a large number of potential brands in mind and methodically winnowed their choices until they'd decided which one to buy. After purchase, their relationship with the brand typically focused on the use of the product or service itself.

Nowadays: The Consumer Decision Journey

New research shows that rather than systematically narrowing their choices, consumers add and subtract brands from a group under consideration during an extended evaluation phase. After purchase, they often enter into an open-ended relationship with the brand, sharing their experience with it online.

Consider & Buy

Marketers often overemphasize the "consider" and "buy" stages of the journey, allocating more resources than they should to building awareness through advertising and encouraging purchase with retail promotions.

Evaluate & Advocate

New Social media make the "evaluate" and "advocate" stages increasingly relevant. Marketing investments that help consumers navigate the evaluation process and then spread positive word of mouth about the brands they choose can be as important as building awareness and driving purchase.

Bond

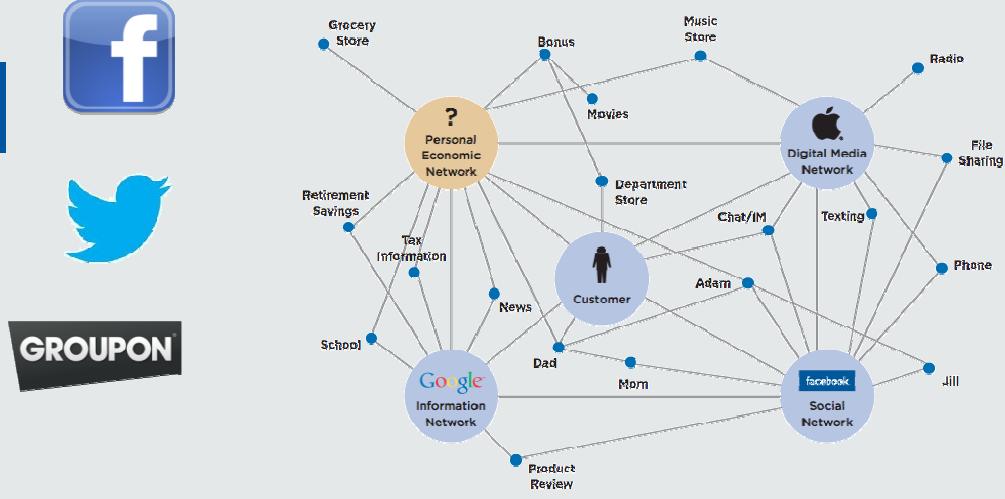

If consumers' bond with a brand is strong enough, they repurchase it without cycling through the earlier decision-journey stages.

Nuevos modelos de segmentación de clientes: aparece el rol del Influenciador

Traditional segmentation models for CPG have focused on category consumption and brand love.....letting brands segment higher value consumers for CRM purposes. Although logical, due to the expense of ongoing CRM comms, it did mean that many medium value consumers would not be engaged with.

However, in the SCRM world, another key segmentation variable comes into play and that is INFLUENCE.....where potentially consumers who would previously have been ignored become key consumers for a brand to engage with.

It is well known and documented that consumers trust other people (even strangers) more than they do brand advertising channels.

So to identify and use consumers who have an above average reach or impact and who might be deemed trendsetters makes sense. Influencer Marketing comprises four main activities:

1. Identifying influencers, and ranking them in order of importance.
2. Marketing *to* influencers, to increase awareness of the firm within the influencer community
3. Marketing *through* influencers, using influencers to increase market awareness of the firm amongst target markets
4. Marketing *with* influencers, turning influencers into advocates of the firm.

Although not synonymous with WOM marketing, influence can be transmitted this way.

Brands should go the extra mile to identify influencers.....consumers who can go to work on behalf of the brand and add disproportionate value.

NOTE: identifying influencers is not the same as blogger outreach....separate tactics can be used to understand who the most influential bloggers are. Kraft use Edelman to do this....

Public relations firm Edelman helped Kraft select the bloggers using a metric system and other criteria to determine which bloggers would have the best influence for the Velveeta promotion.

1. **Know the space.** Use search engines and blogger networks to find a relevant blog already immersed in the space you want your messages attached to. Create a list of search terms based on how people actually talk about the product in real life. Set up Google alerts to see who's talking about your products.

2. **Start big, then go narrow.** If you want to find five bloggers start with 15 and vet them further. Make sure she never said anything negative about the product or brand. Read back at least three months to get a sense of the bloggers tone and style for writing to make

# ¿Qué es la inteligencia social?

## La inteligencia social es un proceso

completamente integrado con la estrategia de su negocio  
que amplifica el impacto de todas las funciones e iniciativas  
aprovechando el poder de las redes de personas  
a través de plataformas sociales

Extracting the gold from social media

Analisi competitiva  
Community

# ¿Qué es la inteligencia social?

La esencia de la inteligencia social

## Escuchar

Integrar todas las fuentes de valor de datos del cliente

## Comprender

Crear un marco analítico integrado que permita *Análisis para las Masas*

## Atraer

Acercar el conocimiento analítico al punto de interacción mas cercano al cliente

Transaction and interaction, structured and unstructured, historical and real time  
Moments of truth, across all channels

1. Customer Information Integration: the integration of all valuable sources of customer related transactional and behavioral data designed to improve the creation and delivery of customer insights. The disruptive element blah and a marketing viewpoint on why its will be disruptive  
**SOCIAL DECISION MAKING - Differentiation includes CI Master Plan with CI version of MDM & IQM services; the creation and management of persistent customer, family and household ID's; rapid deployment data integration services; right time data latency, seamless integration of structured & unstructured data.**
2. Customer Insight Development: Comprehensive descriptive and predictive segmentation and modeling capability using Insanely Simple/Simply Powerful/Analytics for the Masses technologies and leveraging HP's Analytical Competency gained from its own Customer Intelligence business operations, HP Labs and innovative client engagements.  
**ANALYTICS FOR THE MASSES Differentiation includes: Agile CI Analytic Framework & Methodology, selected tools that simplify development & delivery of analytics; selected IP from across HP applied to client scenarios; dedicated analytics community to synthesize best practice with emerging capabilities.**
3. Customer Insight Operationalization: The delivery and integration of customer insights into all primary customer management processes to maximize the top line and bottom line value generated and mitigate value decay inherent in all insight developments.  
**MAKETING PERFORMANCE & ACCOUNTABILITY Need differentiation statement, but it will be around bus technology, guided search and guided decision making, real time delivery of analytic outcomes, marketing optimization, etc**

# Importancia del “negocio social” en el ROI

- Desarrollo de Personas
- Aprendizaje conversacional
- Hubs de Conocimiento (COE)
- Compartir activos e ideas en la organización
- Reclutamiento y feedback
- Confianza interna y defensa

- Ciclo de innovación más corto
- Innovación de Producto y desarrollo de nuevas ideas
- Compartir activos / mejores prácticas a nivel mundial
- Mejorar productos y procesos

- Mejores sentimientos / reputación
- Velocidad del boca a boca
- Menciones no solicitadas
- Confianza y promoción
- Solución a crisis

- Atrae más clientes y de mayor calidad
- Mejor recuperación de clientes
- Atraer / retener clientes de gran valor
- Fomentar venta dirigida y cruzada
- Aumentar frecuencia del gasto
- Aumentar el tamaño de la cesta
- Gestionar el coste de venta
- Gestionar el coste del servicio

CM = customer management

HVC = high value customer

Combining social unstructured data with traditional structured data can fundamentally change the business capabilities for an enterprise.

Bottom right – Customer Experience Optimization – the CMO, marketing, customer intelligence functions that focuses on the full customer experience, such as marketing campaign activities to win back clients, improve cross-sell and up-sell opportunities, and drive more sales and service.

Bottom left – Product Lifecycle Innovation – insights into how your customers are using your products, comments about them, can fundamentally change your product life cycle and innovation; how to use, problems, suggestions, etc.

Top left – Resource Empowerment – from an internal perspective, derive insights on how to improve people development and productivity processes and environments.

Top right – Digital Brand Management - strategic marketing and brand management focus of listening and understanding your customers' sentiments about your products and brands, to respond and take action more quickly to negative sentiments, and capitalize on positive mentions.

# Cómo convertirse en una empresa social

Una empresa socialmente habilitada...

- 1 Combinar datos (sociales) estructurados y no para obtener información actuable del cliente que impulse el crecimiento
- 2 Busca atraer y el compromiso de los clientes y no se enfoca sólo a disciplinas o canales
- 3 Reconoce a influenciadores y clientes de alto valor
- 4 Fomenta la participación, el intercambio, la co-creación... interna (primero) y externa (a continuación)
- 5 Tiene capacidad 'always on'. Contenidos las 52 semanas del año vs campañas puntuales
- 6 Aprende de las interacciones y responde... el aprendizaje social se aplica a toda la empresa, no sólo al marketing
- 7 Sabe cómo ser social aumenta la rentabilidad
